

Softwood Lumber Exports to the United States: 2010 Export Allocation Methodologies

The Department of Foreign Affairs and International Trade Canada (DFAIT) has published a Notice to inform exporters of the allocation methodology and provide the eligibility criteria for export allocations of certain Softwood Lumber products first manufactured in the Canadian Provinces of Quebec, Ontario, Manitoba and Saskatchewan and exported to the U.S. in 2010.

The DFAIT Notice provides that the *Allocation Method Order (2010) – Softwood Lumber Products (AMO)*, takes effect on January 1, 2010 and establishes the export allocation eligibility criteria for 2010. The AMO is authoritative and it is intended that the present Notice to Exporters will assist exporters by describing elements of the AMO. An export allocation may be used for obtaining a permit to export certain softwood lumber products that were first manufactured in Quebec, Ontario, Manitoba and Saskatchewan to the United States.

The DFAIT Notice is available in its entirety online at: [2010 Export Allocation Methodologies](#).
